

Cote-User-Computed Alarm

설치 방법

1. SBApplication 실행
2. MySQL client 에서 kknni_tb_usr 테이블에 다음과 같이 입력

id	email	joinType	name	password
1	duruaal@naver.com	일반	duruaal	123456
2	sgs1159	일반	sgs1159	123456
*	NULL	NULL	NULL	NULL

3. localhost:9040/user/rank 로 보기 > 결과

4.

#Algorithm

Participants: Sgs1159,Duruaal

No	Date	Title	Baekjoon
1	2023-02-19	Duruaal	X (1)
2	2023-02-19	Sgs1159	X (0)
3	2023-02-19	Duruaal	X (1)
4	2023-02-19	Sgs1159	X (0)
5	2023-02-19	Duruaal	X (1)
6	2023-02-19	Sgs1159	X (0)

Settings

Default Project Database Port 1366 - MySQL

Web Application Server Port - 9040

How it works

```
|__common      # Project Common
|__config      # Spring Config
|__ctrl        # Controller
|__entity      # DB Table Entity
|__job         # Spring Batch
|__repo        # DB Table Repository
|__service     # Service
|SBApplication.java # SpringBoot Application Main
```

Getting started

```
# maven build
$ mvn clean package

# servce
$ java -jar target/**/*.war
```
